- $8 \times 4 = 32$
- $4 \times \blacksquare = 32$
- A 32
 - B 12
 - C 8
 - D 4

5. Which is a multiplication sentence for this repeated addition? (4-1)

$$9 + 9 + 9 + 9 + 9 + 9 + 9$$

- A 5×9
- B 6×9
- C 7×9
- D 9×9

6. Ashanti is buying balloons for a party. Each package has 6 balloons. How does the number of balloons change as the number of packages increase by 1? (4-5)

Packages	1	2	3	4	5
Balloons	6	12	18	24	30

- A There are 30 more balloons for each additional package.
 - B There are 30 fewer balloons for each additional package.
 - C There are 6 more balloons for each additional package.
 - D There are 6 fewer balloons for each additional package.
7. Write a repeated addition sentence for 6×3 . (4-1)

8. Renee made a poster of leaves she collected and arranged them in the pattern shown. Write a number sentence that best shows how she displayed the leaves. (4-2)

9. Write a story that could be solved with 5×8 . (4-4)

10. Meagan has a new sticker book. She fills the book with a 4×3 array of stickers. How many stickers does Meagan have in all? (4-2)

11. How can knowing that $7 \times 15 = 105$ help you find the answer to 15×7 ? Explain. (4-3)

12. Complete the number sentence. (4-1)

$$3 + 3 + 3 + 3 + 3 + 3 + 3 + 3 + 3 = \square \times 3$$

13. Madison works at the museum for 6 months. If her work hours continue in this pattern, how many hours will she work in June? Explain. (4-5)

Month	Number of Hours
January	10
February	20
March	30
April	40
May	■
June	■

14. Which number makes the number sentence true? (4-3)

$$5 \times 6 = 30$$

$$6 \times \square = 30$$

15. Can you write $3 + 4 + 5 = 12$ as a multiplication sentence? Explain. (4-4)

16. Molly collected shells at the beach and arranged them in 4 rows. She put 6 shells in each row. How many shells did Molly have in all? (4-2)

17. Stanley has 3 packages of markers. There are 8 markers in each package. Write and solve a multiplication sentence to find how many markers Stanley has. (4-4)

18. Petra earns \$2 setting the table and \$4 for washing dishes. How much will Petra earn if she sets the table and washes the dishes 3 times each? Explain how you can find the answer using a table. (4-5)

Setting the Table	\$2	\$4	\$6
Washing Dishes	\$4	\$8	\$12
